Sludge water

The Port of Halland normally does not charge any extra for disposal of Sludge water from vessels, though certain circumstances may entail additional fees or costs for disposal of Sludge water.

- Notification to discharge waste from "vessels" is not made in time in accordance with Swedish law and the Port Authority's regulations, or if the discharge varies significantly from the actual notification details.
- The waste/sludge contains foreign substances, solvents or detergents.
- The waste/sludge is not generated from the vessel's normal operations.
- Drums and packages with oil residue or hazardous waste are not properly
 packed and correctly labelled with the contents, or if discharging and mooring do not take place at the designated locations.
- Discharging is not carried out at the agreed time.
- If time taken for connection/disconnection of the hose exceeds 15 minutes
- If waiting time before discharge operation commence
- The vessel does not make personnel available to handle the discharging of the sludge.
- The average sludge pumping capacity is less than 5 m3 per hour.
- Discharging that has been ordered and is not cancelled will be invoiced.

Storage fees

Quotation for storing goods can be obtained directly from Hallands Hamnar AB for each assignment.

Tariff **HallandsHamnar** 6

6. GENERAL CONDITIONS:

Day means calendar day 00.00 - 24.00 local time.

WAITING TIME will be charged for all waiting time not caused by ourselves.

BY TON IS UNDERSTOOD A WEIGHT OF 1000 KILOS

Quoted prices for loading and discharging are based upon modern efficient handling conditions. If Hallands Hamnar Halmstad AB considers such conditions not to be fulfilled the company retains its right to change the debiting into working hours as per pages 7 and 8. The customers are normally to be notified in advance or as soon as the poor conditions are stated.

FOR DISCHARGING AND LOADING, the vessel is required to keep satisfactory lighting. Necessary winch- men are supplied by the company and debited the vessel.

CONDITIONS FOR DISCHARGING BULK CARGO BY GRAB.

The ship must be suitable for such cargo handling. That means: Hatch-openings must be large enough to allow free passing of fully opened grabs in diagonal position. If conditions as above are not fulfilled, all arising extra costs will be charged. When discharging by grab, the company is not responsible for any damage that may be caused the vessel because it is not suitable for such discharging. Vessels not suitable for discharging by grab are discharged by casks. Discharging by casks is debited in manhours.

When discharging by grab, the company is not responsible for damage that may be caused to the vessel's floor or equipment unless they are being protected or marked in an adequate way.

Vessels having discharged part of their cargo at another port before completing discharging at Halmstad, are debited any extra costs that may arise because of this.

FOR GOODS DISCHARGED OR LOADED in vessel space not intended for cargo such as peaks, auxiliary boxes, poops etc. or when discharging and loading conditions are such because of wreckage or other extraordinary circumstances that they to a considerable extent hinder normal work on board the vessel, making surcharges on labour wages necessary, they are to be debited the vessel.

Tariff Hallands Hamnar 11

When loading and discharging to and from cold-storage boxes or deep tanks, an extra surcharge is debited, calculated by the company in man-hours of extra work.

The company retains the right to employ extra personnel above the normal gang size, and to debit for them according to valid hourly rates (page 3), when handling goods in older liner vessels and cold storage vessels.

Hallands Hamnar AB retains the right to debit reasonable additional costs, when handling takes place slowly for reasons the company cannot rule over or which can be considered extraordinary, e. g. stowing in a space that cannot be considered suitable for certain kinds of goods. See hourly rates page 3.

The company is not liable for the stowing results and compensation claims for dead freight being rejected.

Hallands Hamnar AB is not responsible for any compensation claims for damages or cost that may arise due to strike, blockade, lockout or other hinders outside the control of the company. The port company is neither responsible for the loss of goods nor the damage to goods being particularly fragile, such as glassware, castings and similar products.

If damage claims are brought against Hallands Hamnar AB the insurance company shall give its approval of any remuneration. Our customers are requested to make allowance for delays that can occur because of this. The terminal rules of Sveriges Hamnar 1989 regulates the company's responsibility for terminal work.
